

Join us for an unforgettable journey  
into the future of technology!

# student summer CaMP 2026

Quantum, Computing, Mathematics & Physics

*Preparing the Next Generation  
Quantum Information Science Workforce*

Discover how the intriguing principles of quantum physics are revolutionizing the world of computing at our month-long summer camp designed for high school students! Participants will receive a comprehensive introduction to the fundamentals of computing while engaging in hands-on activities that explore the often-perplexing phenomena of quantum physics. You'll have the opportunity to apply these concepts to solve computing, sensing, and communication challenges in innovative ways. Throughout the camp, you'll interact with world-class scientists, engineers, and industry leaders, gaining valuable insights and experience in this rapidly growing field to inspire your classrooms and communities.

**DATES:**  
June 29-  
July 24

**LOCATION:**  
Albuquerque, NM

**TIME:**  
9:30am -  
4:30pm MDT

**STUDENT  
STIPEND:**  
\$500/WEEK

**Applications open February 2 - April 3**

**Questions?** Email us at [QCaMP@sandia.gov](mailto:QCaMP@sandia.gov)
