

You already see your students growing. Now you'll be able to show it.

Join five sessions this summer and leave with real evidence of skill growth — built with your students, in your own community.

The gap you've been feeling is real.

95% of districts name skills like communication and teamwork as graduate goals. Only 15% have any way to measure them. This project gives you that way.

By the end of Level 1, your students' StoryMaps will provide examples of every one of these skills — in their own words, anchored to their own community.

FIVE SESSIONS · ONE ARTIFACT EACH · COMPLETELY FREE

In-person and online collaborative team work options available.

For more information contact Ferdi Serim: ferdi@ascend-advance.org

1 What your community already knows

Map the knowledge and skills already present in your students' world.

2 Students as researchers

Shift from fixer to witness. Your students ask the questions worth asking.

3 Witnessing growth

Learn to name what you actually see — not just what you were looking for.

4 StoryMaps

Turn each student's story into evidence a school board, a funder, or a grandmother can find on a map.

5 Community approval

Who gets to say what counts? This session answers that — and changes how you think about assessment.

By the end you'll have a small portfolio of real evidence, built this summer, ready for fall.

Free · No prior tech experience needed · Grades 6–12
